

Northern crack (red line) runs across the lake and is about 1m wide. Southern crack runs to the middle of the lake and turns north, from there runs north about 1km, Crack is about 10-30cm wide.

Ice overall is hard and dry. At point 26 ice has no cracks but is a bit bumpier than in the north. Suitable race areas marked with red circles.

Point 1. Thickness 32cm

Point 3. thickness 35cm

Point 4. thickness 74cm (ridged ice layered on top of each other)

Point 6. thickness 37cm

Point 13. thickness 23cm

Point 18. thickness 28cm

Point 22. thickness 26cm
